Martin Hestmark, ARA, Office of Ecosystems Protection and Remediation

- Work at the GKM was a removal assessment to de-water the mine, treat the mine water behind the unconsolidated blockage, re-open the mine to ascertain from where water was coming and the quality of that water, and obtain baseline characteristics of flow out of the mine

Deliberative Process/Ex. 5

Don Deere, Water Geologist, Deere & Ault, left a message stating he was out of the country and just recently returned. At Deere's earliest convenience, he will be scheduled for an interview.

Libby Faulk, PIO, R8, and Joan Card, Senior Policy Advisor to the R8 RA, will be interviewed.

Still no response from Todd Hennis, owner of the land where the GKM is located, regarding whether he is willing to be interviewed.
